Re: HB 672-Insurance Coverage of Food Allergy Prevention

The stakeholders listed below, wish to jointly submit support for HB672, which would require health plans regulated by Pennsylvania to cover peanut and egg allergen prevention for infants.

The undersigned groups represent thousands of Pennsylvanians throughout the state. Our members include many families managing food allergy, as well as community members working hard to ensure that all Pennsylvanians can enjoy safe & nourishing meals together.

The rise of food allergies over the last 30 years has forced significant changes in food manufacturing, handling, service, and more.

HB672 bill would help both our members and the broader groups we serve by reducing the number of citizens who suffer from food allergies. A reduction in overall food allergies will improve and simplify the lives of millions of Pennsylvanians.

We encourage you to expeditiously consider and advance HB672.

Sincerely,
